This subscription auto-renews at the end of each term according to the plan subscribed, unless canceled 24-hours in advance. The subscription fee is charged to your iTunes account at confirmation of purchase. You may manage your subscription and turn off auto-renewal by going to your Account Settings after purchase. No cancellation of the current subscription is allowed during active period. Account will be charged for renewal within 24-hours prior to the end of the current period, and identify the cost of the renewal. Any unused portion of a free trial period, if offered, will be forfeited when the user purchases a subscription to that publication, where applicableTerms of Service: Policy: Jul 18, 2022 Version 4.26.0 Introducing Presets, a brand new feature that allows you to create the perfect portrait with just one tap. Simply select your preferred effect and leave the rest up to AirBrush! Found this on an App Store whim, so glad I did! This is by far one of the best editing apps. It comes with sooooo many useful features, that a lot of apps don't have, this is my new favorite editor. I give this app 5 stars because there's so many amazing features and customization options, you can tell the developers really put their all into making this. This makes me so happy I'm so glad I found it. I've been searching far and wide for an easy to use editing app with advanced features like this one. I would recommend this hands down! Check it out and you will definitely be impressed.If I could add anything I would just add more options to the make up area. I really like being able to add false lashes in detail, and that's legit the only thing I didn't see on here. You can add make up on here, I just wish it had more detailed make up options. There are many presets that you can pick and choose which make up looks you want to use from each overall preset. I just wish there was individual eyelashes with various customization options, and a little more control over the make up customization part of the app as a whole ect. Great app! definitely worth the download, very impressed. I really love it and I am going to be using it all the time! This is the best photo editing app and has some awesome features & tools but the costs have gotten out of control. At the beginning you could basically use almost every feature for free. Then I paid for & added the premium subscription (thinking that it would naturally cover each new additional feature and tool within each new update, after all it is the "premium subscription"). But no that wasn't enough money and so I paid for 2 individual add on features...so much for the premium... Now you have to pay some absorbent amount for the black feature. I paid for the premium, for 2 separate add on features that should have been included within the premium to begin with but as time has gone on I seem to be losing more features than gaining. At the very least my features should remain the same. Seriously if a person started out with this app from the beginning and paid for the premium, paid for all the add on's and now the black subscription, you would be shelling out enough money to have your photos gold plated. Finally, I would have thought by now that you would have a feature to bring out the color of your eyes more. Like a lot of times unless you have the perfect angle & lighting it's hard to capture your true eye color. If you have blue eyes, you can make them more blue for example. It doesn't seem like that would be very difficult to incorporate. Hi! We are profoundly sorry for the issues you've encountered. You can actually subscribe and use all BLACK features with only one annual fee. To request a refund, please go to your receipt (in your iTunes account, email, SMS, other), tap on "Report a problem" and choose the issue to request a refund and submit your request. All questions related to refunds and cancellations must be directed to the App Store refund applies according to the App Store terms of service.On the new feature idea, we'll forward it to our dev team. And thank you so much for your comment and for taking your time for this. I absolutely love this app! I went to see a friend I hadn't seen in a long time the other day. We wanted to take a selfie together but, we weren't exactly looking our best after 4 months of pandemic! We took the picture and added a little make-up (we each required different make-up) and a filter and we were set! Posted it on FB and let our friends know. I think it's helpful to have this app for impromptu moments that I would like to share but, may not feel comfortable sharing otherwise. Whether I put my make-up on at home or with the help of an app, I'm grateful for both! There are so many amazing filters and make-up looks to choose from! I also have a standard setting that I often use for just me that helps with my trouble spots. I've had cystic acne in the past. These days I'm in my 40's and, although I don't have the cystic acne to worry with, I do have hormonal acne and very sensitive skin. I don't always wear make-up or wear very little. It's nice to know that if I haven't concealed scars or I'm having a breakout, they don't have to be front and center of my picture. This app has truly helped me show my face more in pictures! I just love this app @@@@ well worth a 5 star rating I've been using this app for over a year now and I just cannot fault it works perfectly in editing my pics and there's no other editing app out there that can match this one and this app does an excellent job in editing my pics and I'm satisfied with their editing tools and the app@and there is no other app I'd use on my pics but this one, however there is one tool that would make this app complete and that would be if the creators who do such a wonderful job with this app @ were to add a tool that could minimise or even remove fine lines and if they did that their app would be perfect not that it's not perfect as is just saying @thank you to the Airbrush Team as always you do an excellent job so I'm a very happy customer @@@@ thanks For someone like myself who has a head for radio (meaning very un-photogenic) this app makes my photos good enough for me to upload to social media websites.Ok, I'm a paid subscriber, you'll get the whiners on here saying it should be free of charge. I'll pay the money for something that does what it says.....I'm saying that if the creators of this app would like to throw a couple of months in free of charge I won't say no. LolPlease note, that I have a stack of apps on my phone, and this is actually the 1st review I have ever written..That's got to mean something Hello just downloaded this app and I have to say this app is absolutely amazing Wow @I've been searching for an app just like this one and I think it's perfect in every way and the one tool that I'm interested in cost 99 cents which isn't a huge amount to pay to have flawless pics and so I'm very satisfied with this app and I just cannot fault it except that you have to pay to use some of the tools but I reckon it's worth it and I reckon The Airbrush Team should be commended for creating such a wonderful perfect photo editing app wow Simply the best thank you @ and very deserving of a 5 star rating @ Edit perfect photos instantly The developer, Pixocial Technology Singapore Pte Ltd, indicated that the app's privacy practices may include handling of data as described below.
