 Not explaining science seems to me perverse. December 22, 2017 We've upgraded our model to a new level: not only does it feature new graphics, mobile friendly controls and a whole new stellar view - it will also enable us to publish new features more frequently! List of new features: vastly enhanced space graphics and effects - zoom-out enables to see our stellar neighborhood - added Asteroid and Kuiper belt - advanced options now available for every view - improved and simplified controls Allows applications to open network sockets. Allows applications to access information about networks. Allows an app to access precise location. Required to be able to access the camera device. Allows using PowerManager WakeLocks to keep processor from sleeping or screen from dimming. Page 2 You can download it for USD 9.80\$. new search object: galactic center. repaired persian font June 05, 2019 You can now choose between kilometers / miles and fahrenheit / celsius metric system. December 07, 2018 - improved device orientation (mainly relevant for Samsung Galaxy series) - added missing Messier objects to search list - currently working on spacecraft explorer, stars explorer and messier objects explorer :) December 05, 2018 - improved device orientation (mainly relevant for Samsung Galaxy series) - added missing Messier objects to search list - currently working on spacecraft explorer, stars explorer and messier objects explorer :) September 19, 2018 more bug fixes after update which included: - new visualization system allows fluent movement through cosmos - added ISS, Hubble Space Telescope, Voyager 1 & 2 and Messier objects to search list - added Milky Way galaxy - image credits: NASA/JPL-Caltech/ESO/R - added nightsky terrain - nightsky schematic sizes allows better visualization of celestial motions - added distance meter On the ground grid - Improved options: There are more values to choose from and hope the most easy controls :) August 30, 2018 We added a manual search for all objects! Now you can quickly find any celestial objects just writing some letters from your name - checking by clicking on the search icon on the left. When you're in love, you want to tell the world. - Carl Sagan I like this! 7148 Close Solar Scope is a model of solar system, night sky and exterior space in real time, with precise positions of objects and many interesting facts. Buying you help us develop new features! Get it here The mobile version is available for free (with optional purchases in the application) and allows you to find constellation directly by pointing your device in the sky. Persian font repaired August 19, 2019 - Now you can visit any star of all the 100,000 brighter stars included in our application. Click the View Select and choose Stars to explore or use the search interface to find the star. Updates in this version also include: .
