I did a lot of search on Google on this topic, but one didn't have the desire Result.ã, someone told me that we can use FFMPEG library for this purpose. You can help me or guide me that as I can combine two audio files on Android using FFmpeg. I want to know about the APIs of ã, FFmpeg?. It is better if you can give me any example.Unread, July 14, 2012, 05:23:12 AM7 / 14/12I Enter to reply to Authoryou do not have the permission to delete messages in this groupsign to report message as e-mail addresses AbuseEther are anonymous for this group or you need the visualization member e-mail addresses the permission to see the original Jav ... @ googlegroups.comThe Message = new ffmpegframegrabber ("input.mp3"); grabber.start (); Recorder Framerecorder = new ffmpegframererCorder ("output.mp3", grabber.getaudiochannels (); Recorder.Setsampliformat (grabber.getSampleFormat ()); recorder.setsimplerate (grabber.getsimplerate ()); recorder.start (); Frame frame; WHILE ((frame = grabber.grabframe ())! = null) {recorder.record (frame); } Recorder.stop (); grabber.stop (); But you will have to build Javacv or wait for the next release if you are not inclined to recompile Javacv yourself Samuel Unread, July 14, 2012, 09:18:50 AM7 / 14 / 12I Enter to answer Authoryou do not have permission of cancellation messages of this groupsign for report message as abuseee's e-mail addresses are anonymous for this group or you need the e-mail address member. The permission to see the original JAV ... @ GoogleGroups.comthanks for the response. I just want to clarify two things. 1. It is possible to mix the two audio files, does not mean cocatination or fusion the audio file at the end of other files. For example, I want to mix my voice with background music. 2. We can mix two different audio file formats like .wav and .mp3. If the above two steps, they are possible in the new version of Javacv then I'm going to fill in Javacv for Android.
