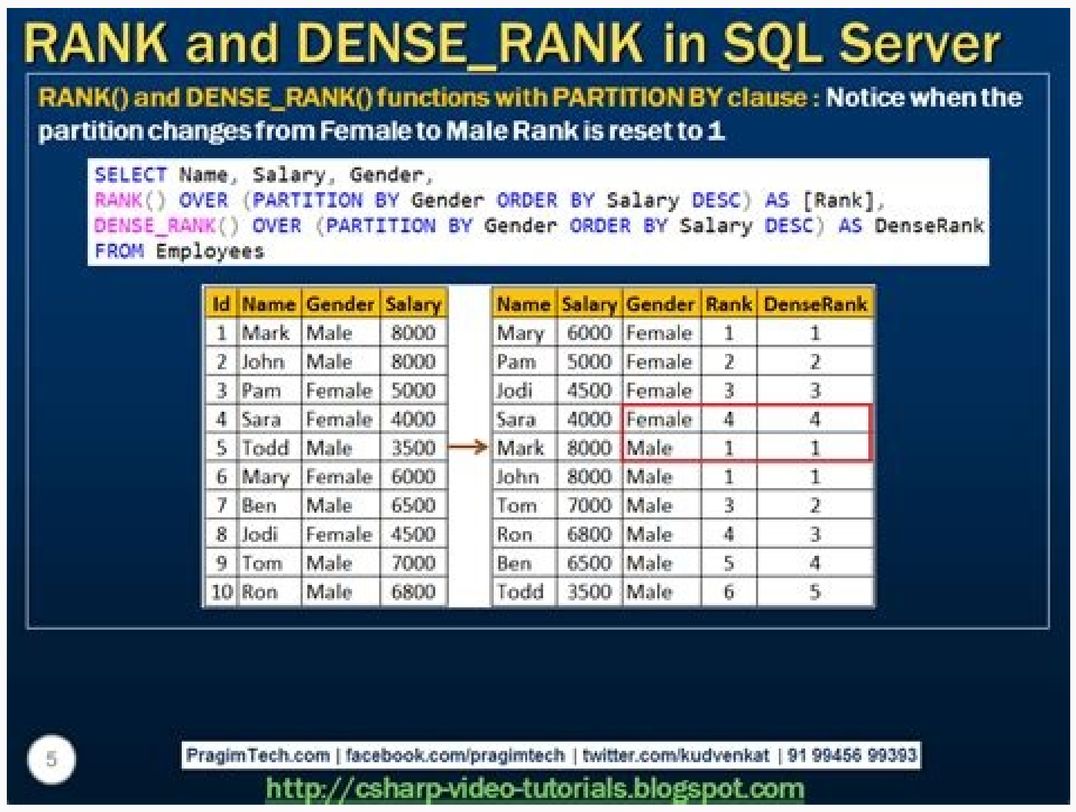
Google sheets charts tutorial



Time Management

The "expenses" workbook should be seen as follows: Since the changes are automatically saved, you can simply close the workbook "expenses". Open a new workbook on Google's calculation sheets. You will be making two graphics in this part of the tutorial. Select the data to be traced. Learn more about the bar graphs. Under the designer options (below the graphic title), select the lower radio button (as shown below). If you are going to make a bar graph as we are here, include a column of names and values and a title to the values. The best Chromebooks available now2.Â ¢ Click on Insert.3. Select the table. which type of table Â, tab annotated from the timeline. Click on it and choose Move to your own SABANA ... save your workbook as "expenses". Then, the table will appear in your workbook, creating a new sheet for your work. Related graphics: Stacked column graph, 100% stacked column letter Â, bar Use a bar graph to show the difference between data points for one or more categories. When creating a graph with cattle sheets, the categories are traced along the horizontal axis or X, while the values are traced along the vertical axis or y. Here are our step-by-step instructions to make a graph on Google Sheets.1. Select cells. Before you can draw a graph with Google's calculation sheets, the numbers that make up the graph must be entered into a workbook. A data point is a piece of information consisting of a category and value. Related graphics: Bubble graph, histogram Â, candlestick Â, organizational ã TRAN Map Â, GEO Use a GEO table to show a map of a country, continent or region. Your workbook should now be seen as follows: Now is the time to optimize the table. Workbook "Expenses" should be viewed as follows: If you click on a slice of cake with your cursor, a small box appears containing the name of the elements, the value of it, and its overall percentage. Learn more about the GEO graphics. Learn more about the grapes of caliber. Click Insert.You've inserted a graph into your spreadsheet.Google Sheets tips Learn how to add a chart to your spreadsheet. Finally, let's move the chart to a separate worksheet. In this case the category is "through friends" and the value is the number of couples who met that way. Â Â Combo Â Â Area Use an area chart to track one or more data series graphically, like changes in value between categories of data. In the new window, first select the "Charts" tab and then select the Chart type as Pie, then select the "3-D Pie" icon (as shown below). The first chart will be a pie chart and the second chart will be a column chart. Learn more about column charts. There are four general steps in defining a chart. Click on the Customize tab and in the Chart Title type "Weekly Expenses" Now let's move the chart's Legend from the right side of the chart to the bottom. Each value produces a gauge, so you can compare and contrast measurements. Each data series in a chart is distinguished by a unique color or pattern. For example, if you were collecting data on how couples first meet, then the number of couples who met through friends would be a data point. Learn more about pie charts. Data series originate from single worksheet rows or columns. You can plot one or more data series in a chart except for pie charts. Next Topic: Creating a Column ChartBack to Main Menu After you've entered data into Google Sheets, youÂ ÂmayÂ Âwant to create a visualization of that informationÂ Âto make it easier to convey. Luckily, Google Sheets makes it easy for you to convertÂ Âdata into a graph orÂ Âchart.Google Sheets gives you a variety of options for your graph, so if you want to show parts that make up a whole you can go for a pie chart,Â Âand if you want to compare statistics, a bar graph will likely make more sense. Data series are a group of related data points. that, as the chart is linked to the workbook data, any subsequent changes made to the workbook are automatically reflected in the chart. Define the desired parameters, such as titles, colors, patterns, and legend from the Graph Tools. Tools.
