ELLIPTICAL

Information and Conditioning

PROPER POSTURE & FORM

- Stand tall with a slight forward lean at the hips (avoid standing in a hunched forward position with rounded shoulders and your head looking down).
- Pull your shoulders down and away from your ears. Have a slight bend at the elbows.
- Hold the handlebars with a light grip and look straight ahead.
- Keep your feet in contact with the pedals at all times. Try to avoid coming up on your toes. Work on evenly distributing body weight through the heels and toes.
- During both the forward and backward motion, avoid bouncing as this allows you to use gravity to help you move the pedals rather than your muscles resulting in a less efficient workout.
- Position your feet parallel to the edge of the pedal, you can place them toward the front or toward the back, depending on the stride length you prefer. Hips evenly lined up.

MOVING HANDLEBARS

Actively pushing and pulling the handlebars engages more upper body muscles.

STATIONARY HANDLEBARS

Use these handles to get on and off the elliptical. Grip the handles lightly so you can maintain proper posture, do not lean into them.

REAR FLYWHEEL

CONSOLE

Set your age and weight. Select a predefined program or set to manual mode. Displays exercise time, speed, heart rate, mph, distance and other factors.

FOOT PEDALS

Large foot pedals, allow you to adjust your stride length by positioning your feet at different ends of the pedals.

GUIDE RAILS/RAMPS

MOVEMENT

Most Elliptical machines can be pedaled forward and backward. In addition the resistance and incline can be adjusted.

Level stride = mimics a running motion with balanced quad/hip and hamstring involvement.

Incline stride = mimics a hiking motion with greater gluteal, quad/hip and calf involvement.

Pedaling Forward = greater quad/hip work.

Pedaling Backward = greater hamstring work.

ELLIPTICAL BASICS

If this is your first time on an Elliptical make sure to follow the following advice:

1. Stand tall with a slight forward lean at the hips (avoid standing in a hunched forward position with rounded shoulders and your head looking down).
2. Pull your shoulders down and away from your ears. Have a slight bend at the elbows.
3. Hold the handlebars with a light grip and look straight ahead.
4. Keep your feet in contact with the pedals at all times. Try to avoid coming up on your toes. Work on evenly distributing body weight through the heels and toes.
5. During both the forward and backward motion, avoid bouncing as this allows you to use gravity to help you move the pedals rather than your muscles resulting in a less efficient workout.
6. Position your feet parallel to the edge of the pedal, you can place them toward the front or toward the back, depending on the stride length you prefer. Hips evenly lined up.

THE WORKOUT

Warm-up

Begin your workout with a 5-minute warm-up to gradually increase heart rate. It should be performed at a light intensity to warm up your body, light resistance to increase your heart rate, and a steady pace for an elliptical.

Cardio

The duration of your workout depends on your fitness level, generally it is recommended that you maintain your heart rate in the target zone for at least 30 minutes to make an aerobic benefit.

Resistance

Adjust the resistance level to your fitness level. As you increase your resistance, you will be able to maintain your heart rate in the target zone for longer periods, usually between 20 and 30 seconds.

Cooldown

Finish your workout by lowering the resistance for 5 minutes to a "cool down". This is important because if you stop your heart rate to drop suddenly on your resistance.

Frequency

Research indicates that to achieve the greatest benefits, aerobic exercise should be performed 3-5 times a week. It is important to allow your body at least 48 hours to recover after exercise before you do the same workout again.

MUSCLES WORKED

Upper Body: Pectorals, Deltoids, Biceps, Triceps, Forearms, Wrist, Hand.

Lower Body: Quadriceps, Hamstrings, Glutes, Calves, Ankle, Foot.

SAFETY

- If you feel uncomfortable stop your workout.
- Do not get on the machine, as the foot pedals can move as you put your weight on them.
- Use caution getting off the elliptical. Make sure the pedals have completely stopped moving.
- Maintain a neutral spine and proper upright posture as you exercise.
- Always lean forward while using elliptical.
- Avoid wearing loose or wrinkled clothing or jewelry.
- Always wear appropriate exercise clothing, including athletic shoes. Do not wear loose clothing or jewelry that can become caught in moving parts.
- Keep children and pets away from the equipment. Children should be supervised to ensure they do not play with the elliptical.
- Keep the area around the elliptical free of clutter.
- Always make sure you're moving safely.
- The elliptical's motor may stop or stall immediately if an object becomes caught in its moving parts.

SELECT YOUR ZONE

To get an optimal workout, it is important to take your resistance, the speed and heart rate in the target intensity level for an extended period of time. Your heart rate zone is the target zone for your heart rate and exercise intensity. If it is too low, you are not getting any substantial health benefits.
