So, in simple words, the Smart Viewer for PC is the software to monitor and manage the CCTV cameras on your computer or laptop or PC is Windows or Mac is your PC. Download Smart PC Viewer Here is the download link available for download Smart Viewer for PC and MAC. If you want to have your CCTV cameras on your PC, then you must download the Smart Viewer for Windows from the link given below. There are two links available for download, one for Windows PC and one for MAC PC. Then, download the installation file according to your requirement. Download Smart Viewer for PC (Windows) Download Features Smart Viewer For main Smart Viewer for MAC Windows Live surveillance video from CCTV cameras. Playback of the recorded file. The rest of the screen support. Management group of cameras by the favorite. log management. Export Registration. User Management. automatic update. dual monitor support Here we are discussing the two methods for the Smart Viewer for PC on your computer. In the first method, we are going to use the official software of Samsung Techwin through which you can not only control of the closed circuit device so as to manage the CCTV cameras. In the second method, we are going to use an emulator and with the help of an emulator, we will perform the exact application on the mobile computer. So let's start the Smart View for PC. Method # 1 Using the Smart Viewer PC software In this strategy, we are going to use the official application given by Samsung Techwin. To do this, you need to download the installation file from the link above. The downloaded file will be in compacted form. You have to separate the installation file before applying it. Subsequent to untangle the file, parts of your PC and follow the means given below. STEP 1 #Installation Smart Viewer for PC Now find your extracted files on our computer and right click on that file. The option called a race like AdministratorA c find and click on this. Now you ask the administrator privilege only give clicking A c Yes. Then the It's about to start. Start the installation program for Smart Viewer for PC now a welcome screen appears to you for installing Smart Viewer for PC. Just click on the A c Nexta button. Directory for Smart Viewer for PC The new screen shows the installation directory. By default, it is set for the C unit. If you want the software installed on the different directory then you can change it by clicking the c change c button as shown in in Photo above or you can leave as well as. Now click on the A c Nexta button. Install the Smart Viewer installation program for PC Now the setup is ready to install Smart Viewer for PC. Just click the Install button A c and then the installation process will start. The installation of smart viewers for Windows The installation process can take a certain time in a waiting way to finish it. Terminate smart viewer installation for PC now the installation process is complete. Just click on the A c finishA c button and the software is ready to run your closed-circuit cameras on the PC. Step 2 # Login to the Smart Viewer for Windows After finishing, the installation process, go to the Start menu and here you can find the folder named A c SamsungA c and the two sub-folders in this folder. Now click on the ViewerA c a Smart. After that, a login screen comes to you. Log in to the Smart Viewer for PC now you have to make a password. First you need to be registered with the default user name and password. The default user name and password for smart viewer for PC is adminA c A c. Set a password for smart viewer for Windows now put the new password for the smart viewer for Windows. Confirm it and press the A c yesa button. Now with the new password in the software. Step 3 # Add samsung cameras on smart viewer software after log in to the software, you can a screen as follows. Add a device to Smart Viewer for PC to this software screen, you need to find a device a name option and appears on the upper screen, as shown in the screenshot above. Click on that icon to add the closed-circuit device in the Smart Viewer for PC. Add the device to Smart Viewer for PC Now this screen can be found an additional device icon, as shown in the photo above. Click on that icon and now you want a pop-up screen to fill your particular device. The second option to add the device into the software is to click on the car icon. This option is only for local vehicle devices if the DVR / NVR is running on the same network as the PC running. Adding the device to Smart Viewer windows for now you filled your detail device in this window. Select the device model in the namea a template. In the type of address, you have chosen the same as the device is running. In my case, I chose an IP AddressA c. Fill the IP address and the door the same as your device. You can find the device's port number in the DVR / NVR network option. ID and password must be the same ID and password device. After filling all the details, click the First Connection Check button. If the connection succeeds the click on the A c RegisterA c button. If the connection has not succeeded correctly or not the address and the number of filling ports. Select the address type on Smart Viewer for PC You can select another address to TYPEA if the device is not running on the IP address. Select according to your type of DVR / NVR address. Now your closed-circuit device has been added to the smart viewer for PC. It's time to see your closed circuit cameras on your computer. Step 4 # Live monitoring on the smart viewer for Windows now you can find the device in the upper left corner. Select the device and click the connection button, as shown in the screenshot below. Connect the Smart Viewer camera for Windows after clicking the connection button the start connection process and will appear the camera on the computer screen. Live view on smart viewer for PC method 2 # use For Smart Viewer in this technique, we are going to use an emulator. An emulator is the product program that allows you to operate an operating system in another operating system. With the help of an emulator, we are going to run an Android os iOS application in Windows or Mac PC. There are a large number of such emulators accessible for free. You can use any of them. Here we are going to use the Bluestacks. Just follow some simple tips to watch closed circuit cameras on your PC. Download Bluestacks Bluestacks the official website. Introducing the emulator on your Mac or Windows PC. Following the introduction of the product, run the Bluestacks on PCs. From that point forward, a move to the My Appa. It will approach the sign or enters. Sign in with your current email account. Quest for the Smart Viewer in addition to. Introducing the application. Run the Smart Viewer in addition to the emulator. Currently include your device in the application equivalent to your mobile phone. Also, you can now look at the Samsung cameras on the PC. Conclusion In this exchange of a smart viewer for PCA we talked about the two techniques. Both strategies are proven to work and the side effect of the two techniques is acceptable. In any case, we suggested the main strategy for viewing the CCTV cameras on the PC. For the situation, you can not use the main technique then go to the second generally use the first. The application is valuable and the best part is that you can project your home in a remote area every time. So this is about a smart Viewer for PCA c. We believe that this data will be accommodating to you. If you find any problems, then it is allowed to remain in contact with us in the comments section. It can likewise compose if all recommendations from your side there will be exceptionally welcome that.
