Cars with g names

All of these cars could be better with a simple name change. A good model name is extremely important to a car's success. History is full of nameplates that have stood the test of time like the Corvette, Mustang, 911 and even everyday models like the Accord and Camry. However, there are plenty of terrible car names throughout history (the AMC Gremlin comes to mind). Even though marketing departments spend hundreds of man hours and research dollars to come up with the right name, there are still some cars on sale right now that make us scratch our heads. Who approved these terrible names? Chevrolet We are all well aware that the Chevy SS was just a rebadged Holden Commodore that was not meant to live a long life. Much like the Pontiac G8 that preceded it, the SS is an enigma that non-car people seem to overlook. GM really didn't seem like it wanted to sell that many of these, and we think that the name shows the company's disinterest. Chevy has plenty of historic names that it could have used for the SS like Nova or Chevelle. Instead it used SS, which was formerly just a trim level for the fast Chevy models. SS doesn't really match anything else that Chevy currently sells, and it stuck out in the range like a sore thumb. This could have been the return of the full-size Chevelle SS but Chevy had to go squander it. Mercedes-Benz We want to take a moment to announce our disappointment with BMW and Mercedes. Both of these companies have gone absolutely nuts with their naming schemes and we no longer live in an age where the numbers following the series name have anything to do with engine displacement. A BMW 330i used to have a 3.0-liter inline six, but today comes with a 2.0-liter four cylinder. Even the AMG models like the C63 used to have a 6.2-liter (close to 6.3) V8, but now come with a 4.0-liter. Would C40 AMG really have been that bad of a name? Only Lexus seems to still be somewhat on track with matching name to engine displacement and we commend it for that. And what about Audi? It couldn't be bothered with it in the first place. As a brand, Infiniti might be the worst offender of a naming scheme that makes no sense. Having the G37 and the larger M37 wasn't too logical, but at least people had plenty of time to get familiar with the naming scheme. Infiniti seems to be targeting Mercedes with it's new scheme of reserving the Q moniker for cars and QX for SUVs. Unfortunately, the numbers do little to tell you about what kind of car it is. To someone who is unfamiliar with cars, the Q50 sounds like a 5 Series competitor, when it is actually a 3 Series competitor. Infiniti has locked itself into this new naming scheme, so we will all have to get used to it at some point. We don't usually have too many faults when it comes to Kia's names, because they are merely boring word like Forte and Optima that are very similar in nature to what Honda and Toyota name their cars. So what was Kia thinking of when it came up with the K900? It sounds like it could be a car that was specially developed for police dogs. None of the other cars in the Kia range have numbers in their names, which makes the K900 seem completely out of place. In other markets, the K900 is badged as the Quoris, which at least matches with every other Kia. We assume that Kia was targeting the S500 with this name to make it sound like the German and Japanese competition. Nissan The Nissan Pathfinder is nothing more than a minivan without the sliding rear doors. It may have a pretty potent 3.5-liter V6 with 284 horsepower, but it is completely let down by a CVT transmission and poor driving dynamics. It didn't used to be this way though. The Pathfinder used to be a rugged looking off-road capable SUV that sat right between the Xterra and Armada in the lineup. The Pathfinder even had a 5.6-liter V8 engine with 310 hp at one point. It's sad to see a once proud off-roader be reduced to boring family runabout. This mon-mobile is no longer used for "finding paths." Instead, it is only used for finding a closer spot in the mall parking lot. To change the ownership of a car, you must complete a vehicle title transfer and submit it to your state's motor vehicles agency. Purchase price (if any)Vehicle identification number Make, model and year of the carCurrent odometer readingLegal names and addresses of the buyer and seller or donor Signed vehicle bill of sale In some states, you may have to pay sales tax on the selling price the car as well as a vehicle transfer fee. Buying the CarMost states require a vehicle bill of sale, which reflects all of the details of your purchase. Many states require a state-specific bill of sale, such as California and Florida, while others will accept a generic form. Your bill of sale -- while an essential part of the process -- is not proof of ownership; it only gives you the right to transfer ownership. Once you have completed the bill of sale, take it to your local motor vehicles agency office, which will issue you a certificate of title. This is proof of your legal ownership and is required in every state. As a GiftFrom a Family MemberEven if the car is a gift, you will still need all of the vehicle title transfer information associated with buying a car. However, there is usually no sales tax required on vehicle transfers between family members in most states. Family members are defined as spouses, parents, children, grandparents, grandchildren, siblings and partners.From a Nonfamily MemberGenerally the same procedures apply as those for gifts from family members, and sales tax is not required.Inheriting the CarUsually, you will need to provide the motor vehicles agency with proof of your identity and your relationship to the car owner, as well as a statement of facts and other relevant documents such as a will, death certificate or any court papers. Consult a probate attorney before starting the inheritance process. At the End of a Lease or Loan PayoffWhile you owe money on -- or are leasing -- your car, the finance company will be listed on the title as the lien holder. The finance company usually takes care of the transfer, and you will receive a lien-release document in the mail. You need to submit the document to your local motor vehicles agency office either in person or by mail.Change of NameYou will need proof of the name change in the form of an acceptable legal document, such as a birth certificate, marriage certificate, divorce decree or court order to give to your local motor vehicles agency office. Be prepared to pay a transfer fee, once the transfer is completed, and remember to update your insurance policy to reflect your new ownership Image: Shutterstock It's true! Only 5% of the male population will be able to name all of these cars! Will you get the honor of sharing your results, or will you choose to keep them to yourself? Once you've done your best to identify all the cars we present, you'll know where you stand. With so many different auto manufacturers inventing new models every year, it can be difficult to keep up. Unless you work at a car dealership, you might find this quiz a little more challenging than you thought. Although we'll try to stick to cars made within the last 30-40 years, you will need to dig into your memory banks to give us the correct name. With 95% of men not being able to pass this test, you will flex some serious automotive muscle by being in the elite group that can name them all. From the Acura Integra to the AMC Pacer, your knowledge of cars will be need to be firing like a fine-tuned piston to get all of them right. However, you have our every confidence, and we know you can do it. Are you in the top 5% of men who can name all these cars? Now's your chance to find out! Our award-winning website offers reliable, easy-to-understand explanations about how the world works. From fun quizzes that bring joy to your day, to compelling photography and fascinating lists, HowStuffWorks Play offers something for everyone. Sometimes we explain how stuff works, other times, we ask you, but we're always exploring in the name of fun! Because learning is fun, so stick with us! Playing quizzes is free! We send trivia questions and personality tests every week to your inbox. By clicking "Sign Up" you are agreeing to our privacy policy and confirming that you are 13 years old or over. Copyright © 2021 InfoSpace Holdings, LLC, a System1 Company Image: Jørgens.m via Wikimedia Commons Someone once said that popularity was not a guarantee of quality, and that may be true of some things but not all things. When it comes to cars, popularity is born from form, function and sometimes even something as simple as price. The best-looking cars, the best handing cars, the best-priced cars can all rise to the top and become people's all-time favorites. That, in turn, can have a considerable influence on the market, sometimes for generations to come. The Model T got to where it was by being first to the table. The Corolla got to be popular because it was affordable and reliable. The McLaren F1 is popular because it was faster than lightning. The DeLorean was popular because it traveled back in time. With so many different ways to make a car popular, it's going to take some serious knowledge to be able to name them all. This isn't just about super fast sports cars, or the most over-the-top luxury cars, all-time top sellers or the most media-friendly. Each one has its own story, and each one captured the hearts and minds of the driving public at some point in history. Now, let's see how many of them you can identify. Buckle up!
