The scars can be pruriginous, painful or unpleasant, and can limit movement. Silicone gel slabs can slightly improve the appearance of hypertrophic scars with respect to the onion extract. Arch Surg 1991; 126: 499A - article, PubMed Google Scholar Gold MH Dermatol Surg 2008; 33: 1291A - article, Google Scholar Page 2 This article is in 66 ° percentile (Ranked 34.044A °) of 102,862 articles traced of a similar age in all magazines and the 50th percentile (classified 1A) of the 2 traced articles of a similar one in general and cardiovascular thoracic surgery See more on Altmetric Altmetric calculates a Score based on online attention item receives. The number in the center of the A° the Altmetric score. We are unsure whether silicone gel sheets work better than most other treatments for hypertrophic scars. hypertrophic. 1989; 106: 781 - 786.CasA - PubMed Google Scholar AHN ST, WW monafum, Mockoe Ta. No studies reported useful results for the assessment of the person of his scar after treatment. No studies reported useful results for people's well-being (quality of life): that if people remained on treatment (grip), if the treatments had undesirable effects; or if the treatments were convenient (the benefits of treatment exceed any additional costs). Studies have not given sufficient information to compare silicone gel sheets with steroid injections, laser therapy or pulsed light. Most scars vanish and become paleal over time, but some scars can become red and raised (called hypertrophic scars). Scars can influence people physically and emotionally, and can influence a person's well-being. Itreatments aim to improve the appearance of a scar and help make it less visible. Social media and mainstream news are the main sources that calculate the score. What are the main results of our review? They are commonly used on healing skin to help soften and flatten a hypertrophic scar. These studies give the most reliable

better than no treatment with silicone sheets or silicone gel, or polyurethane. Silicone gel sheets can reduce pain levels compared to clothing To account for this, Altmetric included context data for other articles of a similar one. Durnero different lengths of time: from 3 months to 12 months. Our studies have reported scars from health professionals use for this review. In this review of Cochrane, Cochrane, He wanted to find out how silicone gel sheets work in treating hypertrophic scars. Search date This review includes tests published until 21 April 2021. We've only been looking for randomized controlled trials, where the treatment each person receives is chosen at random. Hydration, not silicone, modulates the effects of keratinocytes on fibroblasts. Our Methods We looked for studies investigating the use of silicone gel sheets to treat hypertrophic scars. What we found We found 13 studies involving 468 people (425 completed the study) with hypertrophic scars caused by surgery, injuries, burns or burns. Each colored thread in the circle represents a different kind of online attention. A review of the biological effects, clinical efficacy and safety of silicone elastomer coatings for the treatment and management of hypertrophic and keloid scars. *Plast Reconstr Surg* 1998;101:1173A-1183.CASA Article PubMed Google Scholar^A Berman B, Perez OA, Kondi S, Kohut B, Viera MH, Delgado S, et al. We don't know if silicone gel sheets reduce pain compared to self-adhesive sheets propylene glycol and hydroxyethyl cellulose. Older articles often score higher because they have had more time to get noticed. The evidence we found comes from a few studies (sometimes just one), often conducted on a small number of people, with poorly reported results, so we're not sure how reliable the results are. Backgrund A scar is a print left on the skin after a wound or injury has healed, such as after surgery or after a burn. *J Surg Res* 1995;59:705 A-711.CASA^A Article PubMed^A Google Scholar^A Davey KA, Wallis KA, Bowring K, A^A Even the evidence is very uncertain about the effect of gel sheets. Silicone on pain compared to Gecko Nanoplast. Induction of static-electric field via a silicone cushion for the treatment of hypertrophic and cheloid scars. Evolution of silicone therapy and mechanism action scar management. scars. Occlusion treatment for hypertrophic and keloid scars. The studies compared the effects of silicone gel sheets with: which should not be treated with silicone gel sheets; pressure clothing; application of silicone gel or onion extract; polyurethane dressings; steroid injections; it is laser therapy; intense pulsed light or Gecko Nanoplast (a silicone gel bandage). All studies were conducted in hospitals, in Europe (6 studies), China (2), United States (1), Canada (1), Iran (1), Turkey (1) and India (1). *J Am Acad Dermatol* 1994;30:506A-A507.CASEA PubMed^A Google Scholar^A Mercer NSG. They have a soft and gummy texture and stick to the skin. *Burns* 1982;9-2016^A 204.Article Google Scholar Quinn KJ, Evans JH, Courtney JM, Baylor JDS, Br J Plast Surg 1992;45: 599-603A CaseA PubMed^A Google Scholar^A Chang CC, Kuo YF, Chiu HC, Lee JL, Wong TW, Jee SH, Perkins K, Davey RB, Wallis KA. Silicone Gel: a new treatment for burn scars and contractures. Treatment without pressure of hypertrophic scars. Silicone gel plates may also result in a slight reduction in pain levels compared to no treatment with silicone gel plates. Silicone gel in the treatment of keloid scars. Certainty of the tests Our certainty (trust) in the tests was low, or very low. topical silicone gel: a new treatment for hypertrophic scars. *Anesth Plast Surg* 2008;32: 82-92.Article Google Scholar Hirshowitz B, Lindenbaum E, Har-Shai Y, Feitelson L, Tendler M, Katz D. D.

Silicone gel sheets are pieces of thin, flexible medical grade silicone that are placed over the scars and may decrease itching and dryness. They are generally durable and comfortable to wear. ... Keloids and Hypertrophic Scars: Review and Treatment Strategies. Treatments include surgery to remove the scar, steroid injections, or silicone sheets to flatten the scar.
