If you want to use Outlook calendar on Android, you need to sync it with Google calendar first. Photo: MartialRed - Fotolia.com. If you are using the Outlook calendar feature, you need to sync the created calendar with the Android smartphone to always keep track of all collections. If you want to track meetings in Outlook, you can sync Outlook calendar with Android smartphone. Thanks to this, all the notes in the home and home calendar are always valid. The quietest option is the synchronization of the Outlook program with the Google account. The Google calendar, which you use on your computer, automatically synchronizes meetings with a smartphone or tablet with Android, which are registered in this account. This means that all external calendars on a computer with Google Calendar synchronous meetings are automatically synced to the Android device. This saves expensive additional software. There is already a suitable app for Microsoft Outlook app on Android. Access the Google Play Store with a smartphone, download the Microsoft Outlook app and install it. After the application begins, you must sign in to your Microsoft account in order to access your information. You can now choose whether you want to sync calendar data with other devices. Confirm this to transmit your data. You can also sync your Google account with Outlook account in the app. You can also transfer your records from Outlook Calendar to Google Calendar and sync other software from another company. To perform the procedure, the procedure given above must first be synchronized with the Google calendar. This is very easy if you do the following: open the browser and call Google calendar: now click "Other calendar" > "+" > "According to URL". Now add the Outlook ICS connection. Then click "Add Calendar" to sync the two calendars. Advertisement. In order not to miss any meeting, you can also use the Outlook calendar on the Android device. But it's not as simple as it seems. In this article, we show you various ways to organize a calendar if you want to use your Outlook calendar on Android, you must first sync it with Google Calendar. Photo: Martialred - Fotolia.com Use the calendar feature of Outlook, it is recommended to sync the calendars created with your Android smartphone to keep track of all appointments at any time. If you always want to keep track of your dates from Outlook while you travel, you can sync your Outlook calendar with your Android smartphone. This way, all your calendar entries are at home and always up to date. The fastest option is to sync Outlook with your Google account. The Google calendar you use on your computer automatically syncs dates with the Android smartphone or tablet registered with that account. This is called all appointments that you can sync from external calendars on your computer to Google agenda, they will also automatically sync on your android device. This saves expensive additional software. There is already a good app for Microsoft Outlook for Android. Use the Google Play Store on your smartphone to download and install the Microsoft Outlook app to access your information. Submit this to defeat your data. Synchronize with other third party software. The above procedure also works. Your Outlook calendar should already be synced with your Google calendar. It's easy if you do it like this: use a browser and Google agenda search: Now click "More agenda for URL">">". "To keep two agendas in sync so you never miss a meeting again, you can use the Outlook calendar on your Android device. You can also use it. But it's not as easy as it seems. In this article, we also show you different options for your calendars. So everything is at a glance. The easiest way is to access your Outlook calendar directly in the program itself. To do this, sign in to your Microsoft account. Your E-Fails, contacts and calendar entries are automatically synchronized: in the application calendar, you can access the calendar via the calendar icon in the lower bottom corner. However, the disadvantage of this method is that you always have to open the Outlook app to see your appointments, and the other calendar on your smartphone does not appear in the other calendar. In the following sections, we show you how to synchronize all the appointments in your calendar. If you use Google Calendar on your default smartphone, you can sync your Outlook calendar. For this purpose, in the "Calendar Calendars" section, in the "Calendar General Calendars" section. Then add it to your Google Calendar settings in the "Add Calendar" section and add it to the "URL" section. However, in our test, the Outlook calendar only synced in the form of the Google Calendar browser, not on the smartphone. If your smartphone provides sync, you can test it this way. Otherwise, you can add your Outlook calendar to your Google calendar using Google Calendar Sync. You can find our instructions here: Synchronizing with Google Calendar Sync Outlook if you don't want to use Google Calendar. For example, you can use the OneCalendar application. Here you can synchronize and merge your Outlook calendar with other calendars. Regardless, this means that OneCalendar is becoming the primary calendar application. Follow our guide or check out the quick start guide. Install the OneCalendar app on your Android device. Then open the app and go to the symbol with three lines in the upper left corner. In the created menu, tap on "account". Since no account was connected during the new installation, go to Add Account. Select Microsoft to add your Outlook calendar. Finally, sign in with your Microsoft username and password. Enter "Register" by entering your details. Then the application needs access to the calendar, contacts, etc. With "yes". Now you can deactivate individual potential calendars and not connect to application or control and touch the confirmation mark. Now you can touch "add a new account" and add another calendar. Return when you're done. Download, install and use OneCalendar. Tap the crossing icon. Then go to "Accounts". Click "Add Account". Enter the "yes" access request. Click "Done" to connect the Outlook calendar displayed to the application. If you do not want to add a calendar, go to "ready" or "add new".
