Greenhouse automation project report

Check more grow areas that contain more crops or manage a larger area, but is divided into separate grow zones. You can search for air conditioning, tanks, and irrigation with remote control and displaying data as an option. Automatic management of nutrient and pH levels by setting remote alarms with a nutrient dosing system with the possibility to manage and view this remotely. Automatic all aspects of air conditioning control inside the temperature to CO2, humidity lighting with the possibility of managing and displaying the needs remotely. Your are relatively simple - pH automatic / CE control. Grow in an area or larger small crops pH / CE monitoring if you have a greenhouse or many, or if you want to grow a type of culture or multiple types; Our automated control systems can support your business through automatic dosage, air conditioning and fertigation. Even better, when your business grows our system will grow with it. Increasing indoor can include everything from compact containers to warehouses and factories. With the control light, moisture, air flow, air temperature and root zones, nutrients, pH and CE, one can optimize growth and efficiency. Our automation solutions can help grow more intelligent in any internal environment. Case a circle, tunnel houses or canopy protection create microclimates that are perfect for automation systems. By measuring the temperature, moisture, solar radiation can automate irrigation with better control over water and nutrients. If you are trying to extend your season we have a solution for you. If you are interested in retail opportunities in one of our Sunnysides * Dispensary locations, please visit the website: A Sunnyside * Work opportunities California Consumer Privacy Act (A e Ccpa e) for applicants please read California privacy of notice employees, (A e CA Privacy Notice e) As regards the Labsa GRESPA policies related to the collection, use and dissemination of personal information.
