Image: Image source / Photodisc / Getty Images As in each language, Spanish speakers come in a wide range of fluidity. Even native speakers, people who have learned Spanish as their first language, vary widely in their language knowledge. Many speakers have learned Spanish at home but have never learned official grammar and spelling. Others may have learned Spanish at school and acquired all formal Spanish, but when it comes to surviving an informal conversation, they may also be Chinese. Where are you on your language trip? Do you travel with a dictionary or search words on your phone every other phrase? Dream in Spanish? Some say that once you start dreaming in a foreign language, you have reached a higher level of fluence — you are beginning to process information in the new language unconsciously. Learning a new language gives us more than the ability to communicate in a new language. It opens a portal in the culture that gave birth to the language first. Because language and culture are so intertwined, gaining fluence allows you to enter a culture in ways that are blocked if you don't speak the language. Are you fluent, competent or simply dangerous with a dictionary? Translate these questions into answers, and we will tell you what other people hear when you speak Spanish! Heat a large non-stick pan and add some pieces of chicken, leather side down. When the skin became deep golden, mix brown on all sides. Remove brown to a plate and pieces. Add the onion, pepper and chorizo to the pan and fry over medium heat for 5-10min until the onion is golden and soft and the brown chorizo at the edges. Mix in garlic and paprika and cook for 1min. Return the chicken to the pot with tomatoes, rice (the key is to use spanish paella rice, but if you can't find it, use a risotto, which has a round grain) and the boiling water from 750ml (11â " 4 pints). Bring up to a simmer, cover closely and bake in the oven for 30min or until all the liquid has been absorbed and the rice is simply tender. Mix in shrimps and peas; Cover and return to the oven for 5 minutes until it heats through. Condition, gasket, then serve immediately with lemon wedges to squeeze above. Photo Courtesy: Virojt Changyencham / Moment / Getty Images Have you ever found yourself watching Spanish words easy to read for curiosity? you are planning to travel to a Spanish language country, want to communicate better with a nearby native speaker or simply want to expand your languageIt would be great if I could go all-in and learn a little free Spanish. And you can: a program called Duolingo made it possible to do exactly this. After downloading this app to your smartphone or accessing the Duolingo website after creating an account, you can start learning Spanish for free in a few minutes. But what exactly makes this educational tool as effective? Find out more about the program, including as â € "and because â € " it works, before trying for you. Once you have created a free account and select the new language you want to learn, Doolingo starts on a "learning tree" that contains different lessons with specific categories. "You have decided to learn Spanish. During the first lessons, you will begin to master Spanish words easy to read in categories like the days of the week, greetings and colors. Once you have learned the lesson, you will start earning "Crown" that unlock more advanced levels. Photo of courtesy: Duolingo / YouTube The Duolingo approach combines images, audio words and printed to help the mind to form multiple connections between images, sounds and spelling of each word you learn. No matter what your particular learning style is, Doolingo makes it easy to start mastering a new language because of the ways you commit your different ways. Among his other forces there is that Doolingo presents you with quizzes in a variety of sizes. For some quizzes, every Spanish word matches with its English counterpart, while in others the program says the word and asks you to repeat it in your device's microphone. This also helps to strengthen your learning in both visual and auditory ways. If you are locked, there is a built-in language dictionary you can use to reveal what any word date in a sentence way. Depending on your final goals, Doolingo can really work. If you are looking to build a solid base to learn a language or want to increase your basic vocabulary, this application is a great tool. Doolingo makes it easy to learn Spanish and other words. However, it is not going to make you fluent in a language â € "the application simply does not provide enough opportunities to learn the most profound syntax or practice with realistic conversations. In a study by Michigan State University, the participants spent a university semester of time studying Turkish, and then took the regular exam for the Turkish class 101 in person. While all the participants have learned more words vocabulary from the app who knew at the beginning, "no one was able to use the language very communicatively." Photo of courtesy: Duolingo / YouTube a great thing about Doolingo, though, is how interactive is. Not only will you introduce you to new words like your ability to grow, but you will see more recent words worked in sentences with You have learned in previous lessons to help transition into words and progressively difficult concepts. If you are looking for a more immersed experience to learn more Of a language in action, Doolingo also offers stories and podcasts in different languages. Unlike the simple learning of a new language from a book, you can feel that the native speakers use the words you are learning, but in conversations or other formats. It is also worth checking the Doolingo YouTube channel, where you will find things like the duo songs that have native speakers who sing songs in their own languages. Do you want to collect another language apart from Spanish? Watch the user's opinions on the courses that have the property you prefer. Spanish, French and English have the advantage of offering podcasts, while Spanish, Italian, Portuguese, French and German stories offer stories. Photo of courtesy: Duolinedo / YouTube Doolingo built its programs over time, so some of the courses are further developed and more complete than others. Your success with the courses (and what you could decide to choose) also depends on what your mother tongue is, since many of the previous courses have been designed for English or Spanish native speakers. That being said, Doolingo works constantly to maintain its courses. Visit your incubator page to find out if there is currently a course in the development you can help contribute and see what you came soon. Everything from English to the Romanian speakers in Navajo for the English speakers is in the works, and if you don't see more courses to take right now, it is possible that you will find the languages you are looking for in search of Doolingo in the future. Before Doolingo, linguistic software tended to be on the most expensive side. While the programs like Rosetta Stone and open English are still fantastic ways to learn new languages from home comfort, these and other courses that teach you the foundations of Spanish may not be the most economical options for you. While part of his appeal is that he is free to use, Doolingo is not without competitors when it comes to the effectiveness of his teaching, be. Programs like Babbel, Busuu and Fluententuu may also like you. Photo of courtesy: Fluentuttu / YouTube in many ways, Babel is similar to Doolingo, except that requires a monthly subscription fee. During the use of similar techniques to teach users their language of choice, Babel does not include any ad and has a format less players in Doolingo. Busuu is another payment subscription program that is gaining popularity. While Doolingo helps you learn using mother-tongue recordings and feedback in the form of audio quiz, Busuu is designed to make learning more social. While learning new abilities, you will be able to receive feedback from other users around the world that you already talk about the language you are learning. Fluentu takes a different approach to traditional language lessons giving access to a series of real world videos, like the movie trailers, 1 Music and news transmissions, in the language you are trying to learn. While requesting a monthly subscription, it's an interesting concept and could be to be To examine, especially after learning the basics of your new language or if you look for something you feel more immersive. Immersive.
