Cheat codes can be great, but there are also glitches you can do if you don't have the ability to put cheats into your system. Please note that some crashes may cause the game to crash. Some common duplication glitches Pokémon Red Item glitch This method allows you to duplicate items. The method uses MissingNo. glitch, but be careful not to catch them as they can crash the game. You must also have a Pokémon that has both Fly and Surf. At this point, you should also have access to the Sea Foam Islands. This is a great glitch to use when you want to duplicate Master Orbs, Rare Candies, and Gold Nuggets. Steps Place the item you want to duplicate in the sixth inventory slot. Talk to the old man in Viridian City again and watch him catch Pokémon. Fly to the Seafam Islands and travel on the water again. Meet the lost #, but don't catch him, just run, because you can defeat him. After the battle, the item in the sixth slot will multiply, and if you did everything right, then you only need to do this once. Early Mewtwo crash. You can only get Mewtwo when the game is over and you enter Cerulean Cave. There is a method to catch Mewtwo earlier. This also includes the use of MissingNo. The error is similar to the element duplication error. Passage Talk to the old man in the city of Viridian. We're talking about an old man who teaches you how to catch Pokémon. After the scene where you are taught how to catch Pokémon, fly to the Sethom Islands. You will then travel across the water until you come across MissingNo. Don't pick it up or meet other Pokémon until Mewtwo appears. In addition to Mewtwo and MissingNo, there will be other powerful Pokémon and how you can catch Mewtwo. Catching the Mew Glitch This is a very long method and can be used to catch the legendary Mew, but there are a few things you need to remember before we get to the method. Important Things to Remember You need Pokémon that have Fly and Cut. Don't fight Trainer Youngster with a level 17 Slowpoke on route 25. Don't fight the player trainer with two Poliwags and a Poliwhirl on route 8. Steps Go to route 8 where the player is. Stand in front of the door to the underground path, but don't let the Player see you. This is the tricky part, you have to wait for the Player to look at you and see where he is! a sign will appear, press the start button and fly to Cerulean City. Go to Route 25, where there is a level 17 Slowpoke Boy Trainer. If you timed the player correctly, you will notice that you cannot open the menu, which means that he did everything correctly. Defeat Trainer Jungster and you will be able to open the menu again. Fly back to Lavender City and go to Route 8. Follow the narrow path and a menu will automatically appear. Just exit the menu and Mew will appear in combat form. Mew is around level seven, so you can catch him if you have cool bombs and even a master bomb if you want to catch him. This mistake can be difficult to fix, but if you do everything right, you should be fine. Was our Pokémon Red cheat guide helpful?
