How to set up an Amazon S3 bucket and get credentials We suggest following Amazon tutorials and manuals on how to set up your S3 server as their UI and account creation methods are subject to change without our notice. Imagine how many days you need!Topics covered1) How to upload an image into Shopify2) What is Smart Image Upload?3) How does Smart Image Upload work?How to upload an image into ShopifyThere are several cases and possibilities to upload images into Shopify. Then go to Excel and paste the list of images. That way you will be able to guess the image URLs by knowing your SKU or Handles. Use Amazon S3 bucket for image hosting A great bulk way of uploading images to Shopify is using Amazon S3 bucket. Better site load speed and SEO -> higher rankings, more traffic and sales.Bulk square, resize, or crop images to fit any social media or sales channel listing -> professional looking listing, and generate more saleRating:4.7/5¨ÃÂÃ Shopify app link¨ÃÂÃ More info Uploading images into products is easy if you done¨ÃÂÃ have thousands of images. Fill those fields one by one, with your Amazon S3 credentials, so that you end up with a filled form like this: After you will enter and¨Â ÂApply to save your connection details, those will be saved and you will not have to enter them again. Press ¢ÃÂÃApply¢ÃÂÃ and ¢ÃÂÃConnect¢ÃÂÃ You will now be connected to your image server. That import will work because the app allows you to import several images from the same row. One way is to give image names to match the SKU number. Then you can use the Excel formula to concatenate the pieces to make up your URL. That way you can get a clue of how far the overall upload is progressed. On the right side, you see the files and directories on the image server. You may have only a few images for few products, therefore, uploading one by one will work for you. You can add image URLs for products and variants and then you can define the (position) (position) of these images as well. Notice that now in the Image Src cell you will have three images, separated by ; (semicolon). It should connect you again to the image server, and you should see your images again. And then copy-paste each URL to your import file. Find your saved connection there, and click Connect. As you can understand from its name, Smart Image Upload is a bulk image upload tool that makes it easy to upload all of your product images at once and increase your productivity. Different products might have a different count of images. For example, if your SKU isÂ ABC-123, then you can create images with namesÂ ABC-123-1.jpg,Â ABC-123-2.jpg,Â ABC-123-3.jpg, and so on. Many images per SKU or Product Sometimes you need to have more than one image per SKU or per product. The easiest way to do it is to connect again. If your internet got disconnected or CrossFTP closed while upload was not finished The CrossFTP app is robust enough to be able to continue uploading images from where it left off, in case you lost the internet connection or had to close the app. For more details about that feature, read the tutorial how to import several images from the same row. ThenÂ right-clickÂ with the mouse there and select Start Transfer. Guess the image URL from SKU If you have ¢ÃÂÃVariant SKU¢ÃÂÃ in the Excel column A, then the formula to calculate the image link for Product ¢ÃÂÃImage Src¢ÃÂÃ column is: =" your-store-folder>/"&A2&".jpg" Notice the part of the formula ¢ÃÂÃ you need to replace that with your store folder, which is the folder name that comes after the /excelify-images folder or the name of the path to the folder where your Images are in your bucket (you may have something other than ¢ÃÂÃexcelify-images¢ÃÂÃ). It will look like this: On the left side, you see files and directories in your computer. You can decide the positioning of images ht hcnual Oth ow esi nubi nub Â¢ mht nort gniva tsed taht gneat taht gnots kyredlofs> deey Redlof-erotols-Key protect your images from being used by your competitorsImprove SEO by optimizing image sizes, alt-text and file names. What if you have thousands of image and product pairs? Once you need the S3 credentials, here is a great page on how to get Amazon S3 Access Keys. You can go to your Shopify store panel and add images into products easily. That will continue uploading images from where you left off. Press File, and Connect to bring up the Site Manager. How to get URLs for uploaded files? You don¢ÃÂÃ have to worry about that because if the image will be missing from the URL, it will still skip it and continue importing only images that really exist. The default way is to download the version that matches your operating system ¢ÃÂÃ Windows, MacOS, or Linux. We have here found a great manual on how to set up your own Amazon S3 bucket. You only need to keep your images under Google Drive and image names shall include the SKU name of the product, it takes care of the rest and uploads all the images in minutes, while you¢ÃÂÃre working on another task or taking a break.Currently, Smart Image Upload works only for Shopify and uses only Google Drive as the source, but in the feature, it will also work for other e-commerce ecosystems and will use other sources.How does Smart Image Upload work?When you add the Smart Image Upload app into your Shopify store, then it will ask your permission to access your image folder on your Drive. Now you can drag & drop files and folders from your computer (left side)Â Ato the image server (right side), and it will start E¡batrop EHT vacuzod Nac Uoy Ri .gpj.ifs-der-Trihs-Derh.
